

DISASTER MANAGEMENT ANCHOR DESK

NO ONE KNOWS WHAT, WHERE, OR WHEN, BUT ***The Risk is as Real as Tomorrow***

- The U.S. military has used the anchor desk concept to support crisis missions in its territories like Guam.
- The military anchor desk provides support for its first responders like base police and the Federal Fire Department.
- Now, the Disaster Management Anchor Desk (DMAD) can be used by any civilian community as a comprehensive support tool for any crisis including weapons of mass destruction.
